# Read me

This dataset was created to produce a project for satirical AI image classification.

I used the fatkun plugin for web crawling. Relevant images were downloaded and filtered in bulk for Baidu image search keywords.

This is a dataset of the most commonly defined types of Asian women, including six types: elegant women, cute women, sexy women, fat women, thin women, and tomboy.
The total sample size is 936 . This is a labelled dataset.

Example of a data set using :
